Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 11-13, drawn to a method and system for indicating amino acid reading frames for a sequence, and displaying a segment of that sequence, classified in class 702, subclass 20.
- II. Claims 9 and 14, drawn to a method and system for indicating amino acid reading frames for a sequence, including prediction of initiation and termination and plausibility of initiation, classified in class 702, subclass 20.
- III. Claims 10 and 15, drawn to a method and system for indicating amino acid reading frames for a sequence, including coding potential, and coding region plausibility, classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are independent and distinct, each from the other, as they are drawn to differing systems and methods. Each system requires differing components and each method requires differing method steps, differing data, and reaches differing outcomes. Each method ends with the display of differing types of information. Each system and method would require search in substantially non-overlapping art areas that would pose a burden to the examiner if not restricted.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary K Zeman whose telephone number is (703) 305-7133.
